Overview of facilities

Reaction Capabilities

- Nitration
 - Cyclocondensation
 - Ammonolysis (Amidation)
 - Epoxidation (Chiral & Achiral)
 - Reduction
 - Dehalohydrogenation
 - Condensation
 - Noble Metal Hydrogenation (Catalytic Reduction)
 - Oxidation
 - Fischer Indolization
 - Balz - Schiemann (Halex) (Flurination of Amines)
 - Esterification (Including Asymmetri Esterification)
 - Sulphonation
 - Alkylation
 - Methoxylation
 - Halogenation (Cl, Br, I)
 - Acetylation
 - Diazotization & Related Chemistry
 - Grignard Reaction
 - Friedel Craft
 - Aldol Condensation
 - Cynation
 - Chloro Sulfonation
-

- Establish and maintain high standards of quality of its products manufactured at various locations including those at contract manufacturing sites, meeting cGMP & cGLP norms
 - Comply with current national and international regulations as applicable and continuously move towards meeting stringent global standards
 - Products shall be manufactured and marketed meeting all quality parameters related to identity, purity, safety and efficacy through well defined quality assurance and validation system
 - Major thrust shall be given on quality up gradation and product integrity on continuous basis to achieve higher level of customer satisfaction
 - Continuous training of the employees for skill enhancements
-

R&D focus

➤ Manufacturing facilities supported by R&D team which is located at Tarapur

➤ Strength at R&D

• Doctorates	:	03
• Master Graduates [M. Sc]	:	36
• Graduates [B. Sc]	:	11
• Engineers	:	25
• Technicians	:	12

➤ Pilot plant facility at corporate R&D center in Tarapur, which is suitable to manufacture products on kilo scale

➤ R&D is well supported by in house project management team to ensure timely implementation of new products on commercial scale

➤ In last five years about 30 API's have been developed in lab

➤ R&D Center recognized by Department of Science and Industrial Research, Government of India

- **Anti Diabetic:**
 - Started with the commercial operations, received WHOGMP, recently inspected by COFEPRIS
 - Expected revenues of installed capacity would be ~150 cr per annum as per ROW market pricing. Designed for highly regulated markets. Layout has been designed for doubling the existing installed capacity

 - **Antibiotic (3 more Fluoroquinolones):**
 - First in India to manufacture from basic intermediates. In-house technology. Already established market player in this category (FY14-15 sale of 135 cr per annum)
 - Expected revenues of installed capacity would be around 500 cr per annum as per ROW market pricing. Designed for regulated markets. Started with commercial operations, GMP approvals are in progress.

 - **Antiprotozoal:**
 - Double the capacity of existing product to curtail the imports. Existing technology and Chinese JV.
 - Established competitive edge worldwide and sole Indian player.
 - Expected revenues of installed capacity would be around 80 cr per annum as per ROW market pricing. Started with 1.5 times the existing capacity in mid of third quarter.
-

Future business strategy – contd.....

- **Vitamins / Anti-Inflammatory:**
 - Multi-purpose facility under construction. Targeting highly regulated markets
 - Installed capacity will give revenues of around 50 Cr/ 35 Cr per annum as per product selection - Currently on HOLD

 - **R&D product pipeline:**
 - Strong pipeline of products under R&D for future growth
 - Identified some APIs with specialized applications but have volume markets

 - **Formulations:**
 - Small existing business wherein we extend the service than just being a mere API supplier
 - Provide toll manufacturing of formulations
 - Small acquisition on the way to formulate these products in-house for better service

 - **Tie-ups:**
 - We have tied up with European distributor on profit sharing basis. Already 3 dossiers are ready, under stability study. Strategy would be to engage in our own APIs
 - Partnered with USA company on formulation revenues wherein we would be supplying API at cost

 - **Consolidation of existing Anti-biotic:**
 - Growth story continues
 - 50 TPM -> 100 TPM (2013-14)-> 135 TPM (2014-15) -> 150 TPM (current) -> 300 TPM
 - Further backward integration
